Pre-Cambridge

We understand that the child is a whole individual and all the developmental skills are interrelated. This is why we use a Holistic approach in teaching our students. The Pre-Cambridge curriculum is designed to develop basic and essential skills, knowledge, understanding and attitudes that will be built on as a child progresses through the school. Within a positive, nurturing environment all children are able to enjoy their learning and link it to previous experiences. At the core of our practice is the desire to help children develop a love of learning through motivating and purposeful play-based activities. We also aim to empower children to generate their own questions and use their knowledge and skills to find answers.

Cambridge Primary

Cambridge Primary starts learners on an exciting educational journey. Typically for 5 to 11-year olds, it develops young learners who are confident, responsible, reflective, innovative and engaged and includes assessment that proves and improves learning.

Cambridge Lower Secondary

Cambridge Lower Secondary is typically for learners aged 11 to 14 years. Schools can shape the programme around how they want their students to learn, developing young learners who are confident, responsible, reflective, innovative and engaged. The programme provides a natural progression for children from primary education and prepares them for post-14 education programmes that lead to formal qualifications.

Cambridge Upper Secondary

Cambridge Upper Secondary is typically for learners aged 14 to 16 years. It offers learners **Cambridge IGCSE qualifications**. Cambridge IGCSE's provide broad and balanced study across a wide range of subjects, using learner-centred and enquiry-based approaches to learning

Cambridge Advanced is typically for learners aged 16 to 19 years who need advanced study to prepare for university and higher education. It offers learners **Cambridge International AS & A Level qualifications**. Cambridge International AS & A Level help learners develop independent study skills which universities value highly.

The Cambridge qualifications such as the IGCSEs and Advanced Levels are widely recognised by universities and employers. Cambridge students can be confident that their qualifications will be accepted by universities in India and throughout the world. These qualifications provide direct access to degree programmes even at the world's top universities.
